PERSONAL PROJECTS

Build a website for a local coaching center
(09/2021 - Present)

- Structure and design of blue education web application with Django as a backend framework and HTML, CSS, Bootstrap, Javascript, and JQuery as frontend technology. Used content writing software TinyMCE and CKeditor in admin forms.
- Added Sign Up and Sign In methods with OTP verification and Functionality to create MCQ and Input type questions. Deployed it to the Heroku cloud platform.
- The student can view its previous score with an exact snapshot of the attempted question paper.
- I have used Face-api.js for camera monitoring and microphone for anti-cheat actions.

Prabal's Website (07/2021 - 08/2021)

- Build my portfolio with the help of Django as a backend framework. Used Logic of Django Templates, Bootstrap to style pages and forms, and dynamicity with the help of vanilla javascript.
- I have used sendinblue api to send emails to user and admin.
- I have Used github api to list public projects hosted on github profile and medium api to list blog posts.

An Application for extracting and making archive files
(06/2021 - 07/2021)

- I have used zipfile module of the python programming language to extract zip files and added a graphical interface with the help of the Tkinter module.

News Feed Application (04/2021 - 06/2021)
